Soft Skills

- Open to new things
- Communicative
- Attentive and precise
- Good team worker
- Reliable
- Flexible
- Development oriented

Programming skills

- Python - 3 years of mid-level knowledge, but always ready to develop and learn new things. I like to come up with my own projects and implement them, or to solve advanced complex tasks.
- C++/C# - 3 years of experience, I like to write clean and fast codes, I am proficient in data structures, memory management, algorithm management and competitive programming. I also like to participate in competitions, both live and online
- Web development - Creating websites based on React.js with a small PHP knowledge.

Other Skills

- High knowledge of Microsoft Office: Excel, Word, Access, 2nd place in competition
- Intermediate English language skills
- Successful branch basic exam
- Inventing/implementing Arduino projects, thereby automating/simplifying everyday tasks
- Outstanding results in mathematics competitions (algebra and geometry)
